REQUEST FOR A CORRECTED FILING RECEIPT

Sir:

Please furnish the undersigned with a corrected filing receipt for the above-identified application. The corrections needed are as follows:

Please correct the title to read: Application-Independent System and Process for Dynamically Generating **Low-Complexity** Graphics Embedded as Web Content Using a Tag-Delimited Script.

Please find enclosed:

- (1) a copy of the filing receipt indicating the required change, and
- (2) a copy of the first page of the patent application which lists title as indicated in (1) above.

Respectfully submitted,

HICKMAN PALERMO TRUONG & BECKER LLP

Dated: June 14, 2002

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

LICENSE FOR FOREIGN FILING UNDER  
Title 35, United States Code, Section 184  
Title 37, Code of Federal Regulations, 5.11 & 5.15

COPY OF PAPERS  
ORIGINALLY FILED

**GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

**APPLICATION-INDEPENDENT SYSTEM AND PROCESS FOR  
DYNAMICALLY GENERATING LOW-COMPLEXITY GRAPHICS  
EMBEDDED AS WEB CONTENT USING A TAG-DELIMITED SCRIPT**

RECEIVED

JUL 2 3 2002

Technology Center 2100

**Field of the Invention**

10 The present invention relates in general to low-complexity graphics generation and, in particular, to an application-independent system and process for dynamically generating low-complexity graphics embedded as Web content using a tag-delimited script.

**Background of the Invention**

15 The Worldwide Web ("Web") is the medium of choice for publishing information on-line over the Internet, a widely-used public internetwork globally interconnecting countless client and server computer systems. The Internet provides a transport mechanism through standardized communication protocols, such as the Hypertext Transport Protocol (HTTP), for communicating Web content in the form of text, graphics, sounds, animations, and video.

20 Web content is exchanged using a form of scripting language, such as the Hypertext Markup Language (HTML), a tag-delimited scripting language interpretable by a majority of currently available Web browsers. In HTML, Web content is embedded in statements that are interpreted by a receiving Web browser and formatted into readable form using tags included in each statement. The tags can include text and display attributes, such as color and text style, as well as references to downloadable content and hyperlinks.

25 During a Web browsing session, a user can request additional content from a Web server by selecting hyperlinks embedded in each Web page. The 30 hyperlink is relayed by the Web browser as a form of request that is answered by
